

Dr. Lara Varisco Leonhardt, MD

---

April 27, 2020

Welcome to Monday Madness:

Hope everyone had a good weekend. It was beautiful outside. I just wanted to let you all know that our move is complete and we are all full time now at the Woodway location. We had a great first week and can't wait for anyone that has not visited us here before to take the opportunity to now.

We are still open for well child check ups , vaccine visits, and of course sick visits or even urgent care. We are asking everyone that comes to the office to wear a mask and respect other patients personal space. Please call us from the car and we will do our best to bring you directly to an exam room. We are trying our hardest not to use any common areas in our waiting room. We continue to encourage telemedicine via [doxy.me/beewell](https://doxy.me/beewell) as a back up. It is a good tool for adhd, asthma medication refills, rashes, allergies, stomach bug, or even cradle cap and diaper rash. These virtual visits, also known as telemedicine, can take place on your smart phone, tablet, laptop, or computer. No special software, apps, or passwords are needed. We know your children best and want to take care of your little one.

**Testing for COVID-19 in our office has been successful. We are now hoping to start antibody testing for past infections this week.**

Thank you to everyone who have supported us, shared our facebook posts, called, and emailed to check on us. We are doing everything in our power to see your children as safely and efficiently as possible. We are more grateful than you will ever know.

Take Care,

Dr. Leonhardt

We added a few pictures on next page for a quick glimpse into our Woodway location! Come see us.
